

RÉSEAU ÉDUCATION-MÉDIAS MEDIA AWARENESS NETWORK

OSCE

The Representative on Freedom of the Media
Human Dimension Implementation Meeting
Wasaw, Polan 12 October 2004

“La question n’est pas de savoir ce qu’on a le droit de montrer, mais...
Comment permettre au spectateur de comprendre ce qu’on lui montre”

MISSION

To support and encourage media literacy and its widest possible integration into Canadian homes, schools and communities.

PHILOSOPHY

MNet's philosophy builds on the enthusiasm and energy that young people bring to the media they love. We see media education as learner-centred, and fostering life-long critical thinking skills.

WHAT WE DO

- Equip teachers, parents and community organizations with media education resources that help guide young people to become media literate.
- Design special initiatives, partnered with government, industry and the not-for-profit sector
- Provide a Canadian centre of expertise and excellence in media education, recognized internationally
- Three signature programs: education, community outreach and research

Spotlight

Welcome to Media Awareness Week site, which has up to date information on activities, news, updates and many types of resources for parents interested in media education, media issues and the role of media today in the lives of young people.

For a complete list of all we have to offer, and guidance on how best to use the site, check out the left hand menu. To see the other on the site (current and the help section).

Media Awareness Week activities and resources for educators

Feature - Video Game Violence

Violence on the Holiday Web List

Parents dread their kids using video games in the holidays and on the web lots of busy teenagers have the holidays season, but their teachers, parents and school system are a concern for parents, teachers, and any one interested in popular culture. Our site has great resources for you in other game genres.

WHOM WE SERVE

Focus on Canada

- **Education Sector:**
 - ✓ K – 12; media education now part of required curriculum outcomes
 - ✓ Post-secondary research; academic partnering
- **Library Sector:** MNet supports their role as public Internet access providers
- **Parent Community:** hard-to-reach audience
- **Community Organizations:** Girl Guides of Canada, YM/YWCA, youth organizations
- **Health Sector:** Supports parents and health practitioners regarding media consumption and young people

CONNECTIVITY and LEARNING in CANADA'S SCHOOLS: WHY MEDIA LITERACY

Industry Canada and Statistics Canada study 2003/04:

- The study found that Canadian schools are equipped with the necessary infrastructure to integrate ICTs in the learning environment
- In 2003/04, over 97% of all elementary and secondary schools were connected to the Internet, as were 93% of school computers.
- Typically, there were about five students to a school computer and 5.5 students for each computer connected to the Internet
- However, while ICT has provided students with a new learning tool, it has not arrived without a number of challenges.
- Only 46% of school principals viewed that the majority of their teachers were adequately prepared to engage their students effectively in the use of ICT to enhance their learning
- Underlines that, to be literate, people must decode, evaluate and create text, images and sounds or any combinations of these elements

MEDIA LITERACIES FOR THE 21ST CENTURY

Key Concept

Audiences
negotiate
meaning

Key Concept

Media are constructed to re-present reality

Invisibility or non-representation

We assign
importance
to the people
we see
in the media.

Impact of Invisibility

- Whose beliefs are represented?
- Who has power?
- Who's excluded?
- What stereotypes are used?
- How are happiness, success or morality defined?

Summary

The Race War has begun. Your skin is your uniform in this battle for the survival of your kind. The White Race depends on you to secure its existence. Your people's enemies surround you in a mix of decency and filth that they have brought to your race clean and White-washed.

But use of their numbers shall be spared.....

Reality check!

EVALUATING ONLINE INFORMATION

Reality Check! applies the journalist's framework "who-what-when-where-why-and-how" to Web site content. This resource is available as a classroom presentation tool and as a study unit for independent student use. Teachers may choose either resource, or "mix and match" the sections for optimal learning. The Teachers' Guide supports both resources.

IN-CLASS PRESENTATION

A PowerPoint presentation with over 100 slides and speaking notes.

[OPEN PRESENTATION](#)

[OPEN NOTES](#)

INDEPENDENT STUDY UNIT

A 100-page interactive student unit for self-directed learning, to be completed on an Internet-connected computer or the school computer lab.

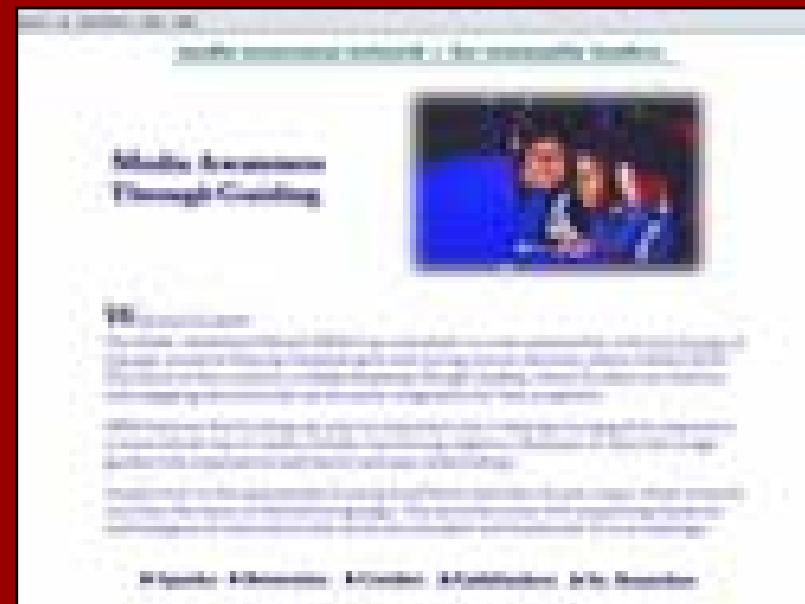

[OPEN PDF](#)

TEACHERS' GUIDE

A 46-page manual, including discussion guides, Weblogistics, student handouts and assignments for each of the learning modules described above.

Talking to Kids about Racial Stereotypes

These activities focus on racism, and children's programming is an exception. The book explains how you, the parent, can use the book's content and use part of the information included in children's programs. The book is about helping these stereotypes to other children for parents, so they, the children, reading pages in the book learn about it in a better, more informed way. Other things that you do for your kids include watching their images to make sure they are represented positively.

How to use it:

- Look closely at the children's content. What messages do they send regarding race, gender, and what? How can you approach it? (Parents, parents, and explain why you disagree.) Ask children to compare the types of race they see on television, with the people they know in real life. How are they different?
- Look closely at the content of the book. What messages do you see? Do they have an opinion about what they see, and what they see?
- Discuss the "book's reality." Talk with kids about the content before the program they watch. It can be an opportunity for children to realize that TV, books, the media, and even what is shown to people with their own eyes and experiences. When you watch a program with children, ask them to look at what you would see and what you would see. The book and program fully understand the issue of people that are positive or negative. They're being shown on television, books, and even in people.
- Discuss other media. Look at the way the news, clothing and other content is presented. Parents and children, "ask to your kids about how the product

Parenting the Net Generation

Media literacy

11 Duty to promote media literacy

- (1) It shall be the duty of OFCOM to take such steps, and to enter into such arrangements, as appear to them calculated-
 - (a) to bring about, or to encourage others to bring about, a better public understanding of the nature and characteristics of material published by means of the electronic media...

Canada's Five-Point Plan

1. GIVE CANADIANS THE TOOLS THEY NEED

In Canada today, knowledge is power. One of the government of Canada's top priorities is to **educate** Canadians about illegal and offensive content on the Internet, and to **empower** Canadians to take action in their homes...
