

Status of Integration Politics and Fight against to the Nationalism in Germany

Dear Delegations of OSCE Members,

To fight against Nationalism and Racism must be the main issue of every country. Nowadays the racist and nationalist activities are increasing rapidly in center of European Countries. It is possible to encounter these activities under the name of extreme Right-Wing social organizations or political parties. So many times governments have chosen to evaluate these events as exceptional cases. Only in 2012, more than 50 cases were reported to the agencies as Racist criminal case to the Turkish citizens in Germany.

On the other hand the former (and potentially the next) Prime minister of Germany has argued that their integration politics were failed to create a Multi-Cultural society in Germany. Now I want to ask to you, dear delegates of the OSCE members; if it is not possible to place Multiculturalism to the base of our Countries, how can we place it to centre of peace and World? Countries must be motivated in this subject and they have to be determined in their political issues. In case of a Germany, unfortunately it is not possible to encounter this determination. If governments perceive Integration as Assimilation or Nationalism as Extreme Right, then we have to say that they are in big mistake.

Recommendations

- 1) German government must implement legal regulations against nationalism instead of evaluating it as extreme Right thought.
- 2) German government must revise their Integration politics. Especially in the matter of Dual nationality right, education rights and social rights. New legal regulations and incentive activities should be organized for national minorities.
- 3) German government must organize and support intercultural activities more, and must compensate intercultural academic researches more.

Recommendations for OSCE

- 1) OSCE must advise and encourage Germany on their politics against Racism and Nationalism, and Integration.

Thank you very much...
