Key facts of the study:

This is a regular update prepared by the OSCE Gender Section Project Team of the project “OSCE Survey on the Well-being and Safety of Women in South East Europe and Eastern Europe”.

The survey is based on the questionnaire and methodology of the European Union Agency for Fundamental Rights (FRA) violence against women survey that covered 28 EU member States.

The project is funded by the European Union.

- This is a computer based face-to-face population survey conducted by female interviewers;

- 1,750 women will be interviewed per location (sample size) and female IDP's will be oversampled where relevant;

- Women between the age of 18–74 will be asked about their experiences of violence since the age of 15, in childhood and within the last 12 months;

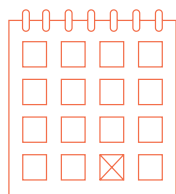

- Relevant Statistical Offices are asked for their support and guidance;

- Data will be collected by local research companies under the guidance of Ipsos MORI;

- Qualitative research will be done in order to take the local contexts into account and to explore the situational of minorities and vulnerable groups.
